Full-Stack Developer

Summary: Results-oriented Full Stack Software Engineer with 4 years of experience, focusing on front-end development using React, TypeScript, React-Redux, and JavaScript. Adept at backend technologies, particularly Node.js with Express, and proficient in managing databases, including MongoDB and PostgreSQL. Demonstrates strong problem-solving skills and a dedication to developing efficient and scalable software solutions. Possesses excellent communication and collaboration abilities, with a proven track record of delivering high-quality projects within specified timelines. Additionally, skilled in integrating React Native for crossplatform mobile development, expanding expertise to encompass versatile application development.

Skills:

- React
- JavaScript
- **TypeScript**
- React Native
- React-Redux
- HTML5 0
- CSS3
- Tailwind CSS
- Responsive Web Design Responsive Web Design
 UI/UX Design Principles
 Agile Methodologies

- o Node.js
- o Express.js
- RESTful APIs
- Authentication and
 - Authorization
- Database Integration
- MongoDB
- PostgreSQL
- Git

- Test-driven
- Development (TDD)
- Continuous
 - Integration/Continuous Deployment (CI/CD)
- o Problem-solving and
 - Troubleshooting
- Project Management
- Team Collaboration

PROFESSIONAL EXPERIENCE

Wish To Wear, Turkey (Remote) – Fullstack Developer

November / 2023 – present

Responsibilities:

- Spearheaded the development and enhancement of the Wish to Wear website, utilizing React for the frontend and Node.js, Express, and MongoDB with ES6 for the backend.
- Implemented various functionalities, ensuring seamless communication between client and the server through the integration of RESTful APIs.
- Collaborated with the design team to translate UI/UX designs into intuitive and responsive user interface.
- Implemented authentication and authorization mechanisms to ensure data security and user privacy.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring high quality software deliverables.

- Worked remotely in an Angeli environment, participating in daily stand-ups, sprint planning, and retrospectives to drive project success.
- Implemented legacy code to the companies code base which increased performance of the application.

Crelax tech – Software Engineer

2/2022 - 12/2023

Responsibilities:

- Developed and maintained front-end components using React, TypeScript, React-Redux, and JavaScript to create intuitive and responsive user interfaces.
- Collaborated with the design team to implement UI/UX designs and ensure optimal user experiences.
- Implemented efficient data fetching and state management using Axios, React-Redux and JavaScript, enhancing the scalability and performance of the applications.
- Integrated RESTful APIs with the front-end using Node.js and Express.js, enabling seamless communication between the client and the server.
- Designed and developed efficient database schemas, utilizing PostgreSQL with pure SQL queries to store and retrieve data.
- Implemented authentication and authorization mechanisms to ensure data security and user privacy.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring high-quality software deliverables.
- Worked in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives to drive project success.
- Developed and maintained user-facing features using React, and JavaScript, ensuring responsive and visually appealing web applications.
- Conducted unit testing and integration testing to ensure code quality and functionality.
- Participated in code reviews, providing constructive feedback to peers and maintaining code standards.
- Actively participated in Agile development processes, including daily stand-ups, sprint planning, and retrospectives.

Education:

Bachelor's Degree in Industrial and Production Engineering (Nnamdi Azikiwe university, Awka),2019 - 2024

Certifications:

FREECODECAMP | 2021-2022

- Responsive Web Design
- JavaScript Algorithms and Data Structures
- Front End Development Libaries
- Back End Development and APIs

Languages:

• English (Fluent)
